Declaration Statement

I am working on a Project Title "**S.R. Trading Co.**". I extend my appreciation to **S.R. Trading Co.**, for providing the necessary resources that enabled me to conduct my project.

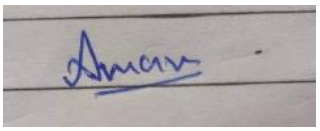

I hereby assert that the data presented and assessed in this project report is genuine and precise to the utmost extent of my knowledge and capabilities. The data has been gathered through primary sources and carefully analysed to assure its reliability.

Additionally, I affirm that all procedures employed for the purpose of data collection and analysis have been duly explained in this report. The outcomes and inferences derived from the data are an accurate depiction of the findings acquired through thorough analytical procedures.

I am dedicated to adhering to the information of academic honesty and integrity, and I am receptive to any additional examination or validation of the data contained in this project report.

I understand that the execution of this project is intended for individual completion and is not to be undertaken collectively. I thus affirm that I am not engaged in any form of collaboration with other individuals, and that all the work undertaken has been solely conducted by me. In the event that plagiarism is detected in the report at any stage of the project's completion, I am fully aware and prepared to accept disciplinary measures imposed by the relevant authority.

I agree that all the recommendations are business-specific and limited to this project exclusively, and cannot be utilized for any other purpose with an IIT Madras tag. I understand that IIT Madras does not endorse this.

1 Executive Summary and Title

This project proposal is an integral part of the Business Data Management Capstone project, of BS in Data Science and Application from IIT Madras. It centres on a local Ladies Sarees Saler, S.R. Trading Co., situated in Chandni Chowk, Delhi, which caters to the Business-to-Business (B2B) segment, specializing in Different type of Traditional Sarees fashion apparel.

S.R. Trading Co. main issue is substandard profitability brought on by highly competitive market. The company experiences low profit margins and lack of storage spaces especially in festival season. By using data analytic tools to find patterns and sales trends, it is intended to relieve these worries. To overcome these challenges, the project will employ various data analysis methodologies, including sales trend analysis, top-selling products, market trends, demand forecasting, and inventory optimization techniques learned from the "Business Data Management" course. By analyzing sales data, the project aims to extract meaningful insights and recommend actionable solutions. The expected outcome is an enhance inventory management, improve customer satisfaction, and boost overall profitability for the shop.

2 Organization Background

S.R. Trading Co. is a small yet dynamic business located in the bustling market of Chandni Chowk, Delhi. The business was founded by the Sudesh Kumar (Owner). The shop provides quality made Different types of Sarees to its local retailers. These shops play a crucial role in
the supply chain of the fashion and textile industry. These shops often cater to a niche market, offering different types/styles of sarees at to a competitive price. Today, the business is completely managed by Sudesh kumar.

S.R. Trading Co. faces stiff competition in the market. The shop strives to address the various types of Style, Material, Design in Sarees etc demands of its clients while navigating the difficulties presented by rival businesses in an ever-changing atmosphere.

3 Problem Statement

- Lack of an effective inventory management causes the shop to have shortages of products.
- Due to a lack of data-driven insights, the shop may not be optimizing its sales potential, which could lead to lost income possibilities.
- Because the store does not adopt a proactive purchasing approach based on demand trends, it orders sarees reactively, which results in bad customer satisfaction.

- In traditional saree market of Chandni Chowk, credit is a vital part of doing business. The business also faces credit line issues.

4 Background of the Problem

- Chandni Chowk is a hub of whole sale and retail ladies' garments like (lehngas, sarees, ethnic wear, and suits) etc. The business has to keep their margins slim because of very highly competitive market.

- Many traders in Chandni Chowk rely on credit for ordering stock on a credit line & the delay in receiving payments from customers can lead to severe cash flow issues.

- There is a huge competition in sarees market and S.R. Trading co. is interested in keeping up with the competition.

- Because shop does not consistently collect and evaluate sales and inventory data, it cannot make well-informed decisions.

5 Problem Solving Approach

Details about the methods used with Justification:

A. As there is no digital record-keeping system in place, the primary source of data is the bills of sarees ordered each month. Collecting data from these records is essential to access historical sales and inventory information.

B. To enable systematic analysis, the collected data must be entered into spreadsheet software. Spreadsheets provide a structured and organized format for data storage and manipulation

C. Organizing data by product category allows for a more granular analysis. It helps in identifying trends, sales patterns, and performance variations within specific product categories.

D. Excel is a versatile tool for data analysis. Graphs and plots generated in Excel provide visual insights into trends related to inventory, volume, profit, revenue, and quantity sold. Visualizations enhance the understanding of data patterns.

E. Summarizing data using pivot tables and Excel tools simplifies complex data sets. It allows for quick extraction of key insights and facilitates decision-making.

Details about the intended data collection with Justification:

A. The major source of historical sales and inventory data is physical records like bills because there is no digital record-keeping system. Three months' worth of data must be gathered in order to undertake an in-depth study.

B. Separating and entering data by months and weeks allows for tracking monthly as well as weekly trends and variations in sales. This granularity is vital for understanding performance.

C. Hence, data for three months has to be collected, cleaned and entered into spreadsheets for further analysis.

Details about the analysis tools with Justification:

A. The tools used for data analysis are Excel and Google Sheets.

B. Excel has a wide range of tools for data analysis and visualization. It makes it possible to analyze multiple revenue, sales, profit, and other aspects in order to meet project goals.

C. Excel and Sheets can be used to create various graphs, tables, for better understanding the trends of the data.

6 Expected Timeline

A. Data from Jan to March has been collected.

B. Once the data is received, the process of entering the data into excel will begin.

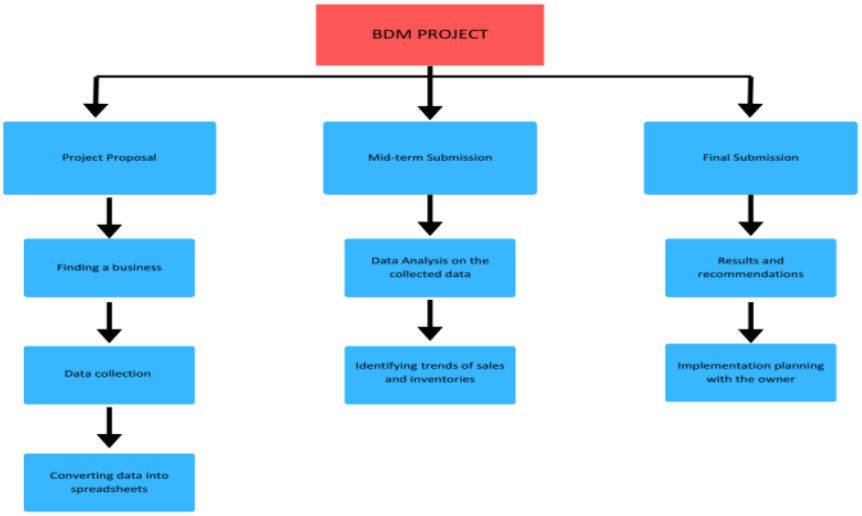

Figure 1:- Work Breakdown Structure

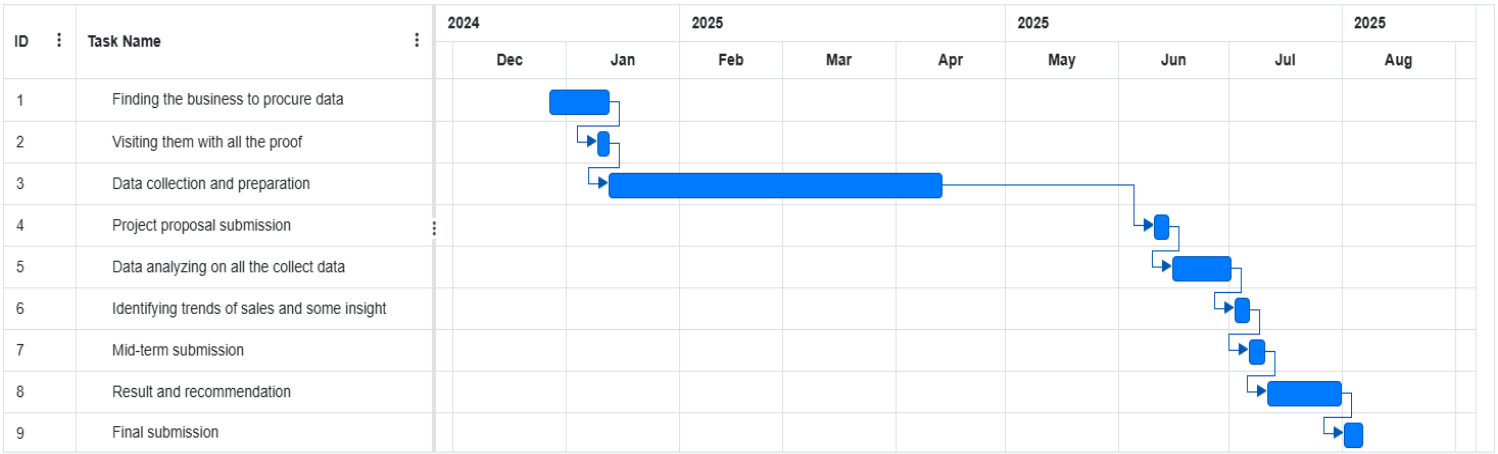

Figure 2: - Expected timeline of the project

7 Expected Outcome

A. With the help of tools like Excel, I hope to find an improved way for inventory management to ensure that the products are in stock and to prevent chances of stockout.

B. I wish to find possibilities to increase profitability by analyzing data. This might include pricing tactics, finding items with are high margins.

C. With better inventory management and product availability, S.R. Trading Co. can serve its customers more efficiently, leading to higher customer satisfaction and loyalty.

D. By analyzing sales data, I can find the top-selling products or categories. This knowledge can inform marketing strategies.
